## Profiles of Chemists

**Marena Brown**

**Research Scientist / Engineer  
Procter & Gamble  
Cincinnati, OH**

### **Education:**

B.S. - Chemical Engineering, Rice University

M.S. - Chemical Engineering, Georgia Tech

Ph.D. - Chemical Engineering (Bioengineering), Georgia Tech

### **Job Description:**

Research Scientist / Engineer in Anti-Microbial Technology / Consumer Products

### **Video Transcript:**

"I work in Research and Development; I work in laundry and cleaning products. I work with cleaning products and the specific area that I work in is called antimicrobial technology so that means I work on compounds or things that kill germs. I'm not closely associated with an end product. I'm not closely associated with a something that you see on a shelf later. I'm looking at ways or things that we can do that can be incorporated later to make it better later on."
