Profiles of Chemists

Matthew Lynch

**Senior Scientist
Corporate Research Division
Procter and Gamble
Cincinnati, OH**

Education:

B.S. - Chemistry, Virginia Tech

Ph.D. - Chemistry, University of Wisconsin-Madison

Job Description:

Senior Scientist in the Corporate Research Division

Video Transcript:

"I do what we consider kind of more of a physical chemistry physical analytical chemistry where we actually look at the assembly of molecules and how to measure that and how to quantify that so we assemble molecules in crystals, we assemble them in solutions, how to measure that in terms of the arrangements of atoms, the arrangement of molecules, and how they grow to form bigger aggregates in solutions as well as in crystals themselves. So we do diffraction methods. We do infrared, as well as microscopy methods."
