Profiles of Chemists

John Crawford

**Process Chemist
Rohm and Haas
Springhouse, PA**

Education:

B.S. - Chemistry, Bucknell University

M.S. - Chemistry, Polytechnic University

Job Description:

Process Chemist in Agriculture Chemicals Process Research

Video Transcript 1:

"I get to take materials and projects when they are in the discovery phase and begin to work on scaling it up. And we really escort it right into the production facility and what we do there is we get involved in training of the staff and get them up to speed on the chemistry and the safety elements and we get involved in the equipment design and really every element of the production process we oversee it it's really very hands-on."

Video Transcript 2:

"Chemistry is not static at all. One of the things that I really value about the type of position I have and really enjoy is that my work assignments do change quite often as my company continues to try to stay at the front of its industries."
