Profiles of Chemists

Susan Ragudo

**Forensic Scientist
Division of Forensic Science
Commonwealth of Virginia
Norfolk, VA**

Education:

B.S. - Chemistry, Susquehanna University

M.S. - Forensic Science, Virginia Commonwealth University

Job Description:

Forensic Chemist

Video Transcript:

"A forensic chemist is in general somebody who analyzes evidence that's brought in from crime scenes or whenever a crime is committed and determines a conclusion from the tests they run on that piece of evidence. You have something that's an unknown substance like we have in drug chemistry and you're determining what it is. You're trying to help put pieces together to see if a crime actually occurred."
