## Profiles of Geoscientists

**Brent Miyazaki**

**Environmental Services Program Manager  
Advance  
Whittier, CA**

### **Education:**

BS, Cal State Northridge (Geology)  
MS, Univ. of California Davis (Geology)

### **Job Description:**

Environmental Services Program Manager

### **Advice to Students:**

"The future in the geosciences -- there's true need."

### **Video Transcript 1:**

"The future in the geosciences -- there's true need. The needs are going to be a little bit different and require some different skills. There's going to be jobs in the U.S., but many of the jobs are going to be tied to the international markets. Development of the third world countries. What some people call developing countries."

### **Video Transcript 2:**

"One of the things that they can do that's very easy in some universities, maybe not as easy in others, but places where I went to school, we had a tremendous ethnic diversity of students and that includes foreign students from other parts of the world. And by socializing with people from all walks of life, we can learn about the similarities and the differences between us, between the cultures. It's very easy to sit and ask someone, over a meal or a drink - well, what is life like where you're from?"
